even in your workplace. suitably easy! So, are you question? Just exercise just what we pay for below as skillfully as evaluation **basic eigrp configuration lab answers** what you taking into account to read!

With a collection of more than 45,000 free e-books, Project Gutenberg is a volunteer effort to create and share e-books online. No registration or fee is required, and books are available in ePub, Kindle, HTML, and simple text formats.

## **Basic Eigrp Configuration Lab Answers**

Lab Purpose: Enabling basic EIGRP routing is a fundamental skill. EIGRP is an advanced distance vector routing protocol. It is also a Cisco proprietary protocol (but now also an open standard) that runs over IP protocol number 88. As a Cisco engineer, as well as in the Cisco CCNA exam, you will be expected to know how to enable basic

## **Taylor & Francis**

Enable the EIGRP routing process on each router using AS number 1. The configuration for R1 is shown.

```
R1(config)# router eigrp 1 R2(config)#  
router eigrp 1 R3(config)# router eigrp
```

1. What is the range of numbers that can be used for AS numbers? 1 - 65,535.  
Step 2: Advertise directly connected networks.

Task: Configure OSPF on the R1 Router.  
Step 1: Use the router ospf command in global configuration mode to enable OSPF on the R1 router. Enter a process ID of 1 for the process-ID parameter.  
R1(config)# router ospf 1 R1(config-router)#  
Step 2: Configure the network statement for the LAN network.
