Towers of the Sun | Board Game | BoardGameGeek

The 70m-tall Tower of the Sun was created by Japanese artist Okamoto Tarō for Osaka's Expo '70. While the curious three-faced creature (there's one face in the back) has been open to interpretation (and critique) for decades, there's no doubt that it has become the symbol of the expo and of the energy and optimism that surrounded it.

The darker shapes wider at the base and becoming slender at the top are the towers and the very light color is the terrain that they sit in forming the background against which the towers are seen. This terrain is so uniformly very light reflective as seen in the full sunlight that it could be water reflecting the sunlight but I have no way of confirming this.
